柔・後期

2027 年度 東京有明医療大学大学院 保健医療学研究科

博士後期課程 柔道整復学分野 入学試験（一次募集）

問題用紙

受験番号		氏 名	

問題 （１）～（５）の英文の内容を日本語にしなさい。

（１）Arch height index (AHI) and arch height flexibility (AHF) are useful methods for evaluating foot structure.

（２）Although foot structure may be linked to intrinsic factors such as gender and load conditions, information on AHI and AHF in consideration of these factors is lacking.

（３）This study aimed to examine the effect of gender and load conditions on AHI and AHF.

（４）One hundred Japanese youths (50 males, 50 females) were recruited in this study.

（５）Arch height and truncated foot length were measured with an AHI measurement system.
